DETAILED ACTION

Summary

On December 16, 2004, an Office Action was mailed to the Applicant rejecting claims 1-18. On March 18, 2005, the Applicant responded by amending claims 2 and 9.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Notani (6,119,149), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed March 18, 2005 have been fully considered but they are not persuasive. The Applicant argues that Notani does not disclose a computer program that distinguishes between simple and complex tasks, a server coupled to a hub for performing simple and complex tasks, parsing and determining the relative complexity of tasks associated in a message, sending moderate to high complexity tasks to a heavyweight server, or sending simple tasks to a lightweight server. In response, Notani discloses a method and corresponding system for allowing collaboration during decision making comprising a computer program that distinguishes between simple and complex tasks (discloses global collaboration framework for delegating decision making and tasks to the appropriate system), a server coupled to a

hub for performing simple and complex tasks (the server coupled to the hub processes multiple collaborations and is capable of delegating out simple and complex tasks), parsing and determining the relative complexity of tasks associated in a message (global collaboration system is able to parse and determine the complexity of a task), sending moderate to high complexity tasks to a heavyweight server (global collaboration system is able to parse and determine the complexity of a task), and sending simple tasks to a lightweight server (the global collaboration system is able to delegate simple tasks to the appropriate server). Notani discloses a global collaboration system where activities are tailored to a particular group to provide multi-enterprise collaboration. Therefore, the Examiner is interpreting Notani as reading onto the invention substantially as claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
